

# Backlight membrane

Backlight membrane for refrigeration applications

PN05/18 APRIL

Dear Customer,

Dixell completes the range of solutions for commercial refrigeration and food service with the introduction of the new backlight membrane interfaces for WING LH. The backlight solution features a visually aesthetic design of lighted keys and it is designed for commercial refrigeration, food service, and catering applications.

Thanks to its superior versatility, the membrane can be customized in different colors, shape and dimensions depending on the cabinet model.

## 1. Compatibility

The backlight membrane can be used in combination with these WING LH models:

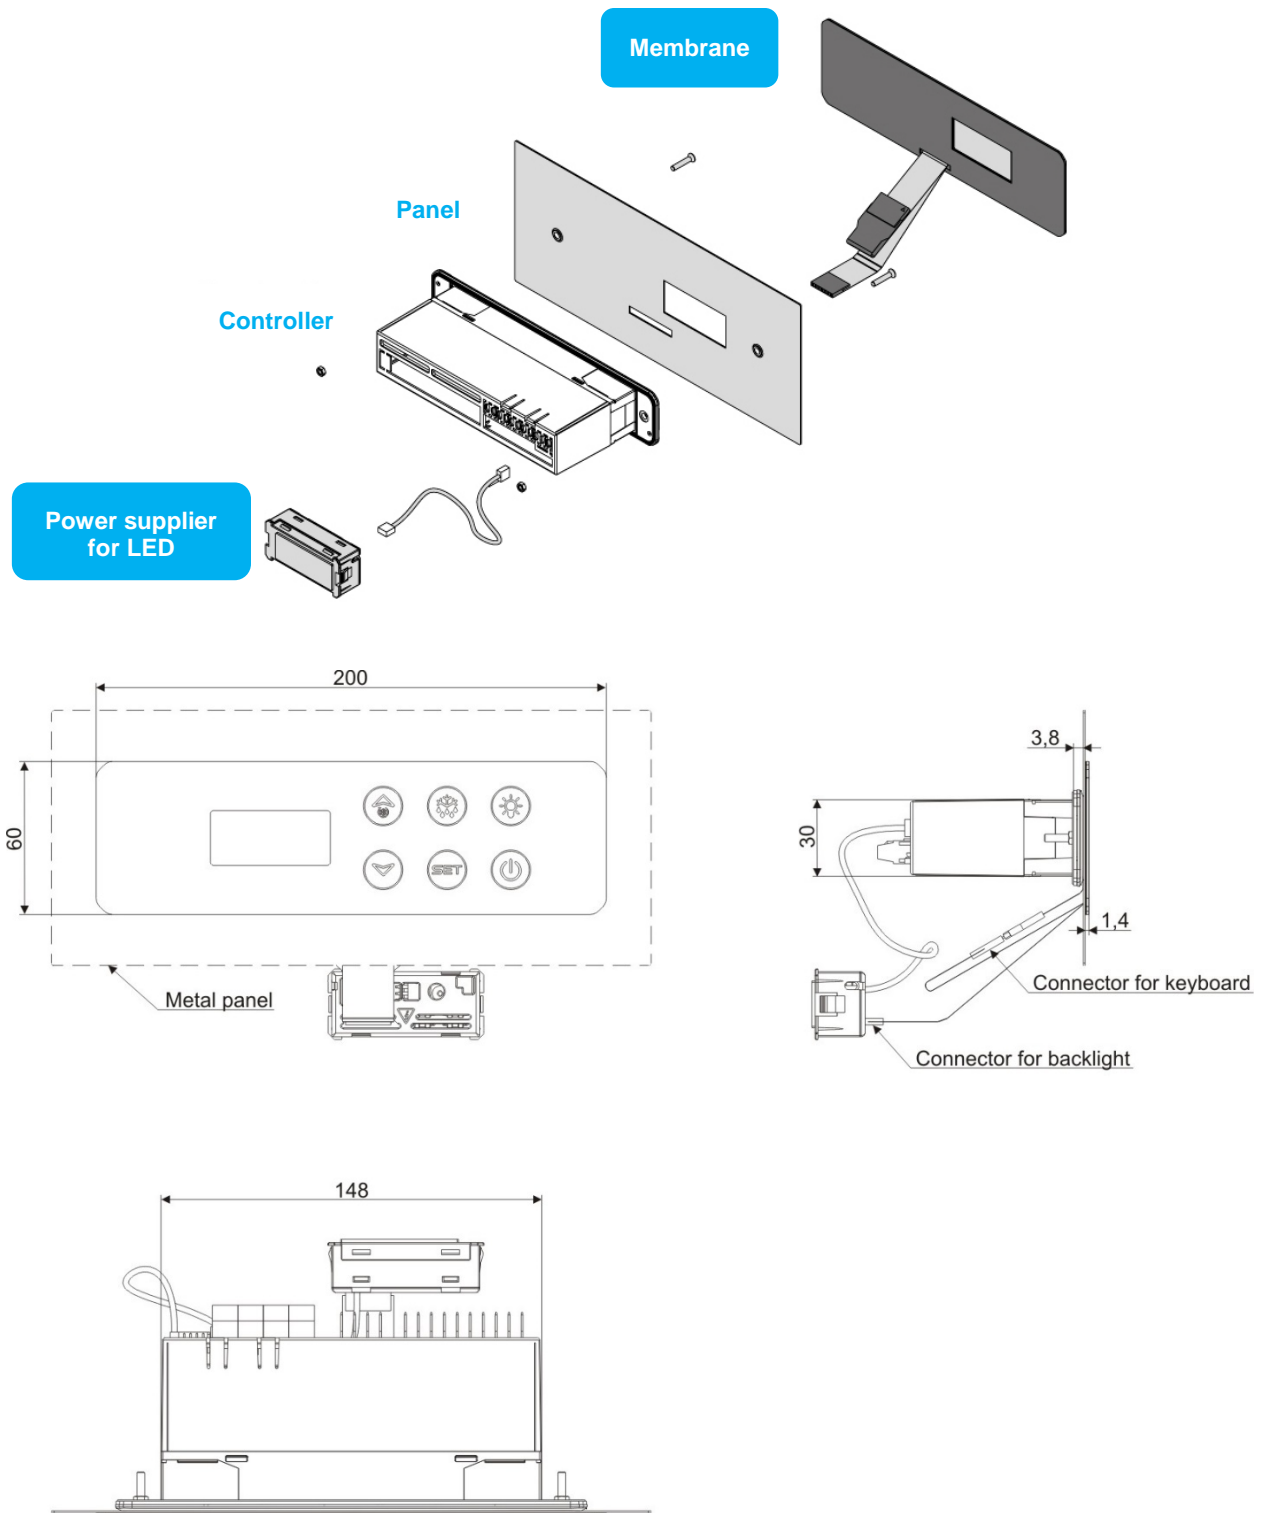

- XW20LH
- XW60LH
- XW70LH
- XW90LH

Note: controllers with backlight membrane can't be connected with a remote display.

## 2. Main features

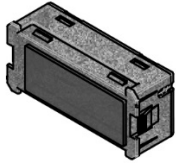

- Brand visibility and high customization level
- IP65 protection
- Easy to clean

## 3. Mounting

## 4. Main accessories

WING LH controller provided with the backlight membrane solution has to be combined with a power supplier with its cable. They are sold separately, please contact our sales department for orders.

	<p><b>PW-MBR-00000</b> Power supplier for backlight membrane</p>
	<p><b>CABLE (DD900000 19)</b> Cable, 19cm for the connection between the backlight membrane and WING LH controller</p>
